

AIR HYDRAULIC RIVET ALLIGATOR SQUEEZER
with REMOTE INTENSIFIER

These hand held riveters offer great ergonomic advantages in comparison to air only powered compression models. They are smaller, lighter, quieter and more versatile for ease of operator use. One of many distinct advantages is that the tool itself is about half the size of most other compression riveters, additionally there is constant force throughout the entire stroke of the tool which provides consistent rivet forming.

MODEL	STANDARD YOKES *		SQUEEZE FORCE (lbf)	RIVET DIAMETER CAPACITIES **		
	REACH	CLOSED GAP AT END OF YOKE		SOLID ALUMINUM	SOLID STEEL	TUBULAR STEEL
NXS-A6	6.00"	1.38"	10,100	9/32"	1/4"	5/16"
NXS-A8	8.00"	1.38"	7,862	1/4"	3/16"	5/16"
NXS-A10	10.00"	1.38"	6,416	7/32"	3/16"	1/4"

* NOTE: Other size yokes available, call for details.
