MODEL HR-141 BENCH RIVETER

Easily Operated by
Pulling the Handle Towards You!

The Model HR-141 is a low production rivet setter designed for light assembly operations. With its long handle and cam design, it develops a very strong squeezing action. The riveter has a 6-1/4" throat depth with a 7/8" stroke and its anvil height is adjustable for different rivet lengths. Just bolt to a bench and you are ready to rivet!

CAPACITY UP TO:

5/32" Diameter Tubular Steel Rivets

3/16" Diameter Tubular Aluminum Rivets

3/32" Diameter Solid Steel & Hard Alloy Aluminum Rivets

3/16" Diameter Solid Soft Alloy Aluminum Rivets

Length up to 1-1/4"
